

CAPITAL PROJECT BICYCLE CHECKLIST

This checklist provides an easy prompt regarding bicycle facilities that should be a part of all campus planning initiatives and new building projects.

PLANNING AND DESIGN

Minimum parking spaces: 10% of average peak building occupancy

Preferred rack type: single inverted U

Lighting: minimum .5 foot-candle

EXTERIOR BIKE PARKING

Total spaces needed ____

Located at building ____

Centralized nearby ____

Lighting provided ____

INTERIOR FACILITIES TO CONSIDER

Locked storage room ____

Secure cage ____

Shower ____

Lockers ____

BICYCLE ACCESS

Does project maintain or improve access by providing pathway widths that accommodate pedestrians and bicycles? ____

Are access route turns negotiable by pedestrians with bicycles? ____

Are sightlines at turns safe for bicyclists and pedestrians? ____

Is any signage needed to address bicycling movement / safety? ____

CONSTRUCTION - TEMPORARY BIKE PARKING

Number of spaces ____

Location ____

Lighting provided ____

Needed ____

BICYCLE ACCESS AROUND CONSTRUCTION

Is temporary access route wide enough for pedestrians with bicycles? ____

Are access route turns negotiable by pedestrians with bicycles? ____

Are sightlines at turns safe for bicyclists and pedestrians? ____

Is any signage needed to address bicycling movement / safety? ____
